

State:

-greeting: String = "Hello, Student"!

-totalTasks: Int = 7

-completedTasks: Int = 0

Event:

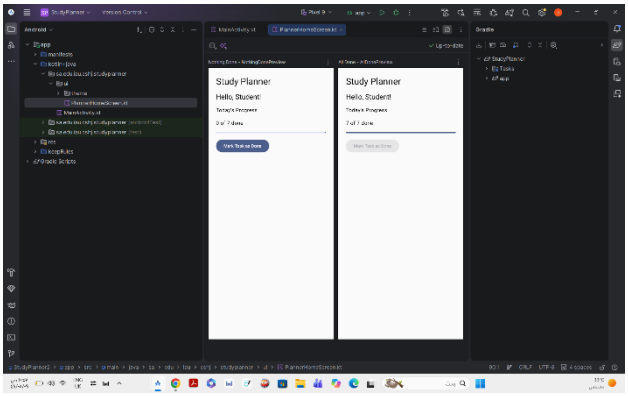

-onMarkTaskDone

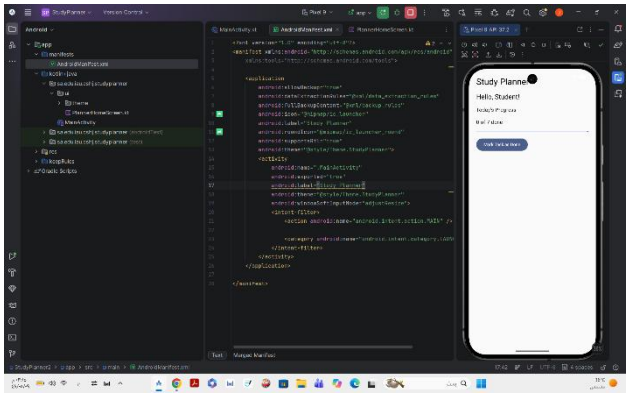

Behavior:

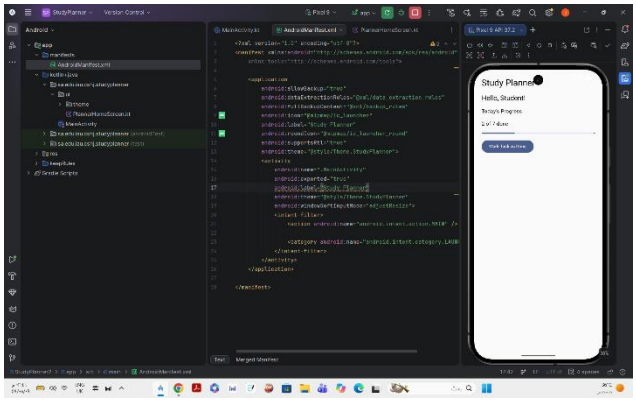

-Each click increases completedTasks by 1.

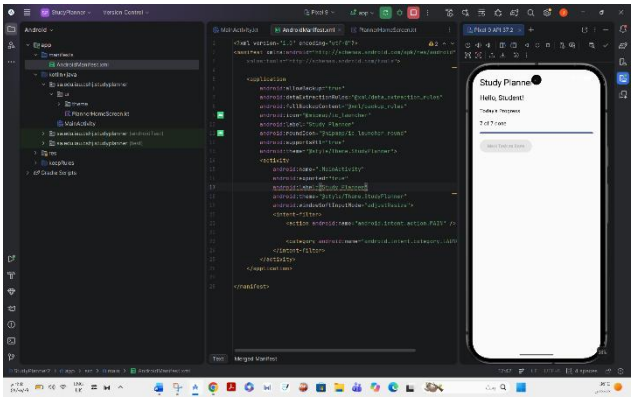

-The progress bar updates automatically.

- The button is disabled when completedTasks = totalTasks.

AI Use & Disclosure Log – Lab 4

AI Tool Used: ChatGPT

Purpose: Used AI to understand lab requirements, explain Jetpack Compose concepts, and assist with code examples and troubleshooting.

My Contribution: I created and organized the project in Android Studio, configured the application, and implemented the code with AI guidance.

Verification: I tested the application using the emulator and Compose Previews, verified the progress updates, and checked the assignment requirements.
